Table 3B -

The following list includes pre-order legacy system error messages found in both IMA production and IMA SATE, but where the error message currently varies due to the timing of IMA SATE deployment in advance of the release in production.

Table 3B - IMA Production and SATE legacy system error message variances due to release timing	
IMA PRODUCTION ERROR MESSAGE	**SATE ERROR MESSAGE**
OSS Gateway: Error caught by Fns; Message[0]=Received Error From FnsGateway (6.2.2.2) on message ResDupAccountList: Invalid host info	Received Error From FnsGateway (6.2.1.11) on messa ResDupAccountList: Invalid host info.

Qwest

Change Summary

In this change summary, the table number describes which of the tables above the change applies:

> Table 1 = Production Legacy System Errors
> Table 2A = SATE Legacy System Errors
> Table 2B = SATE SIA Legacy System Errors
> Table 3A = Production Error messages not in SATE
> Table 3B = Production and SATE Variances due to Release Timing

Table Number	Error Message	Added/Removed
	Combined Production Legacy System Errors, SATE Legacy System Errors, and SATE versus Production Variance documents into a single document	
2A	Loop Qualification Query: OSS Gateway: Error caught by data source Message[0] ERROR No information was found for this address.	Added
2A	Loop Qualification Query OSS Gateway: VERIFY STREET NAME Address is not an exact match	Added

Table 4: 9.0 IMA ERRORS LIST-Version 5 (BPL)

This list includes all errors generated by IMA. It is not intended to include those error messages generated by Qwest legacy systems.

When seen in production, all errors in this list with an error code beginning with "WO" will be preceded by the form name and, when applicable, the section name where the error is occurring. The form and section name correspond to the form and section names found in the IMA EDI Developer Worksheets located in the IMA EDI Disclosure Document.
